XCEO Releases BoardPortal PLUS Android App Version 1.0

XCEO, Inc. has released its BoardPortal PLUS[®] App in an Android version for the first time. The BoardPortal PLUS Android App offers the full functionality of the web version of BoardPortal PLUS, except certain administrative functionality, while giving users another platform for accessing BoardPortal PLUS on the go. XCEO is committed to providing a consistent user experience across all platforms, and the BoardPortal PLUS Android App brings BoardPortal PLUS to Android devices with the same convenience and flexibility already enjoyed by iPad users.

Highlights of the features in the BoardPortal PLUS Android App include the Portfolio, automatic sync, multi-factor identification, a secure email system, and purge.

The Portfolio is a dedicated storage space that allows users to save meeting materials locally, enabling them to have access to these resources anytime, even when offline. When users log in while connected to the Internet, board books are automatically saved to the Portfolio. Users may also choose to save any other documents to the Portfolio for offline access.

For ultimate information-sharing flexibility and security, board administrators may choose to automatically delete all board books within the Portfolio up to 30 days after a board meeting. Board secretaries may also modify the deletion date of board books saved in the Portfolio.

In recognition of the frequent need to update board books as corrections and further information come to light, the BoardPortal PLUS Android App includes an automatic sync feature. This updates all board books within the Portfolio whenever users have a data connection, so that board secretaries can be confident that all of their board members have the most recent information at all times.

The BoardPortal PLUS Android App includes state-of-the-art security to fully protect all board documents and communications. It provides multi-factor identification, which significantly decreases the ability of unauthorized users to obtain complete login information; it also supports a secure email system that enables users to communicate confidential information without exposing it to unsecured personal email. In addition, the BoardPortal PLUS Android App offers a purge feature that allows the boards' general administrator to remove data and deactivate an account if a device is lost or stolen. These features dramatically lower board and director risk.
